PROFESSIONAL SUMMARY

Versatile Full-Stack Engineer and Technical Consultant with 10+ years of experience spanning software architecture, DevOps, and team leadership. Proficient in JavaScript, TypeScript, Python, and C#, with a comprehensive understanding of end-to-end product delivery and system reliability. Currently leveraging extensive backend and infrastructure experience to design and deploy AI-driven solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python (Proficient) | C# (Familiar) | PHP, Java (Prior Experience)
 - **Frameworks & Libraries:** Ember.js, Express.js, Nest.js, React.js, ASP.NET Core, React Native, Flutter
 - **Cloud, DevOps & Platforms:** AWS (EC2, S3, Lambda, API Gateway, IAM), GCP, Supabase, Firebase, Docker, Kubernetes
 - **Databases:** PostgreSQL, MongoDB, MySQL, SQLite
 - **AI Engineering Tools:** OpenAI API, LangChain, LangGraph, Hugging Face, OpenCode
 - **Methodologies & Core Tools:** Git (GitHub/GitLab), CI/CD (CodeShip), Vite, Build Tools (NPM/PNPM/Pip/Maven)
 - **UI & Styling Frameworks:** Tailwind CSS, daisyUI, Bootstrap, Bulma CSS
-

PROFESSIONAL EXPERIENCE

Freelance – Remote

Full-Stack Engineer & Technical Consultant | *April 2025 – Present*

- Modernized a critical legacy business platform, engineering a completely new web application from the ground up to replace an unmaintained, high-risk system.
- Strategized and executed critical patches on the pre-existing legacy environment, stabilizing ongoing operations and ensuring data continuity during the migration phase.
- Delivered technical keynotes and workshops on AI engineering, educating diverse professional organizations on leveraging LLM orchestration, agentic workflows, and modern AI tools to optimize operational workflows.

VerifiedTalent Inc. – Remote

Full-stack Developer, DevOps & Technical Team Lead | *March 2021 – April 2025*

- Led end-to-end technical execution and served as Technical Advisor for multiple cross-functional projects, steering architectural design and translating product requirements into concrete engineering deliverables.
- Architected and developed decoupled frontend and backend applications utilizing a high-performance microservices architecture to maximize platform scalability and domain separation.
- Designed and orchestrated AWS cloud infrastructure alongside robust CI/CD pipelines via Bitbucket, reducing deployment cycle times and automating web administration protocols across all production environments.
- Mentored and managed an engineering team, establishing code review standards and workflow best practices to increase sprint velocity and optimize project delivery timelines.

DevPartners – Remote

Full-stack Developer | *June 2020 – February 2021*

- Engineered robust web applications utilizing Ember.js for frontend interfaces and Node.js for scalable backend API architectures.
- Configured, secured, and maintained client-facing production systems hosted on Linux VPS environments, managing system dependencies and ensuring high platform uptime.

Neso Technical Solutions, Inc. – Cebu City, Philippines

Software Engineer | *November 2016 – April 2020*

- Developed and deployed commercial web applications for international and internal corporate clients leveraging JavaScript and PHP ecosystem stacks.
- Modernized application lifecycles by introducing CI/CD automation and containerization via Docker, drastically mitigating environment configuration drifts and improving pipeline consistency.

Sprobe, Inc. / Sprasia, Inc. – Cebu City, Philippines

Systems Developer | *May 2014 – August 2015*

- Built and optimized an in-house VoIP system, developing cross-platform native features across Android (Java) and iOS (Objective-C) codebases.
- Engineered backend web applications tailored for international clients using enterprise Java frameworks.

EDUCATION

Bachelor of Science in Computer Engineering University of San Carlos Technological Center – Cebu City, Philippines | *2014*
